

NYOUG Training Day Registration Form
Scripts and Tools for Oracle Troubleshooting and
Advanced Performance Analysis
with Tanel Poder
sponsored by New York Oracle Users Group (NYOUG)

This training day is designed to help make everyday Oracle troubleshooting and performance analysis work easier, by providing the right tools for the right problems. Not only must databases and SQL statements be optimized, but it is also important to optimize the use of your time. Using the right tools allows you to work more proactively. This session demonstrates the main scripts and tools that Tanel uses every day to facilitate troubleshooting and performance analysis quickly and accurately. A systematic approach for diagnosing different types of performance problems will be applied throughout all of the demonstrations. The content of the training day will be roughly split into two focus areas:

1. How to make your everyday troubleshooting and DBA work easier
2. How to collect and analyze *relevant* performance data

Tanel Poder is an experienced consultant with deep expertise in Oracle database internals, advanced performance tuning and end-to-end troubleshooting. He specializes in solving complex problems spanning multiple infrastructure layers such as UNIX, Oracle, networks, storage and recently the whole Exadata hardware/software stack. Tanel is one of the first Oracle Certified Masters in the world, passing the OCM DBA exam in 2002. He is also an Oracle ACE Director and a proud member of the OakTable Network. In addition to consulting and delivering seminars worldwide, Tanel also publishes troubleshooting tools and technical articles at his website <http://tech.e2sn.com> and blog <http://blog.tanelpoder.com>.
