OCI Observability Professional Certification

Accelerate your career by gaining new and valuable database and cloud management skills

Professional1Z0-1111-23 | Oracle Cloud Infrastructure 2023 Observability Professional (English, Brazilian Portuguese, Spanish)

Job Roles: Observability Professionals, Cloud Developers

This learning path is designed for DBAs, Observability Professionals, and cloud developers who want instrument observability solutions using OCI Observability and Management platform.

In this learning path, you will learn to:

- Monitor environments using OCI monitoring service
- Respond to cloud resource changes in real-time using the Events service
- Visualize log data using OCI Logging service
- Provide deep visibility into application performance using OCI APM service
